To: [REDACTED]

Good Afternoon,

[REDACTED], my name is Carl Boyd. I am an electrical contractor in the state of Florida. My license number is EC 13007240, this can be verified by myfloridalicense.com at the Department of Business and Professional Regulation. This is not an attempt to sell you anything, or gain any compensation.

I have been notified that a fraudulent permit has been pulled for a solar project at your residence using my contractor number. I wanted to contact you personally to inform you that my signature was undoubtedly forged in an attempt by an unlicensed contractor to perform work on your home. The DBPR has opened an investigation, and these individuals will be held accountable. It is imperative that you do NOT allow an unlicensed, unqualified person to install any electrical apparatus on your residence. I will not be held responsible for any workmanship performed, nor will any manufacturer honor any warranty of products installed. There are no insurance providers that I'm aware of that will absolutely not honor any illegally installed electrical systems. Further, it is completely against Florida law for you, or any other person to perform workmanship under my license without my consent. It is also highly illegal to allow an unlicensed contractor to perform work on your home. I have enclosed a letter that was sent to most all Florida jurisdictions earlier this month.

My purpose of this letter is simply to notify you so that you don't find yourself in a compromising legal situation. I would suggest that you find a licensed and insured contractor within the state to perform your installation. A complete listing is available at www.myfloridalicense.com.

Thank you,

Carl Boyd
